# *(LF) Fund of Funds - Life Cycle 2052, a sub-fund of (LF) Fund of Funds*

Eurobank I Class, ISIN : LU1668837500, Currency: EUR

This Fund is managed by Eurobank Fund Management Company (Luxembourg) S.A., part of the Eurobank Group

## Objectives and Investment Policy

This Fund's investment objective is to achieve capital appreciation in the long term.
The Fund has a clearly defined target investment date: 31 December 2052 (the "Target Date") which sets the time-frame within which the investment strategy of the fund will unfold along the general guidelines described hereafter:

The Fund adopts a moderately high risk profile at the start of the Investment period when the Target Date is still relatively distant. Subsequently and progressively, the Fund will be increasing its allocation to assets that have a lower risk as the Target Date approaches. On Target Date, the Fund is expected to be invested mainly in debt instruments and/or cash investments.

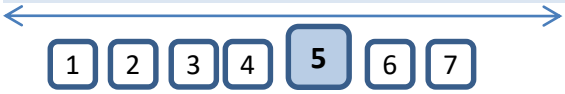
The Fund invests primarily in UCITS and/or UCI which invest in debt securities, equities, money market instruments, time deposits, cash, as well as in financial derivative instruments including Exchange Traded Funds (ETF). When the investment in UCITS and/or UCI is not considered appropriate, the Fund may be invested directly in underlying targeted assets. Emphasis is placed on international diversification of investments.
The fund is actively managed which means that the investment manager is actively making investment decisions for the fund. The latter is not managed in reference to a benchmark

The Directors will decide before the Target Date, whether the Fund will be liquidated or contributed to another Fund or to another UCITS of the Management Company to the best interest of shareholders.
You can buy or sell shares of the Fund on a daily (bank business days in Luxembourg and Greece) basis.
All income of the Fund is reinvested.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money before the maturity of its investment strategy.
**For full investment objectives and policy details please refer to the prospectus.**

## Risk and Reward Profile

**Lower Risk/Reward** **Higher risk/reward**



**What do these numbers mean?** They rate how the Fund may perform and the risk of losing part of your capital. Generally the potential for higher gains also mean a larger risk of losses. The lowest category does not mean a risk free investment.

Historical data, such as ones used for calculating this indicator, may not be a reliable indication of the future risk profile of this Fund.

The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.
For additional details on risks, please refer to the prospectus.

**Why is this Fund in category 5?** The Fund is classified in the specific category because its share price may fluctuate moderately comparative to higher or lower categories classifications. Therefore the likelihood of bigger losses or gains is comparatively moderate.

The Risk / Reward profile is a reasonably accurate reflection of the risk inherent in the Fund under past market & operational conditions. As regards potential future extraordinary events different from those occurred in the past history of the Fund, these are not captured by the Risk / Reward profile; other risks not captured by it include -the risk due to operational failure, i.e. human error or failure in systems and processes, -the risk due to unforeseeable unusually big orders by clients to exit the Fund, which may result in worse than expected entry/exit price levels, -in cases that the Fund invests in derivatives, mainly the risk of failure of derivative counterparties to fulfill their obligations.
